From its start in 2006, Itinera's ambitious mission has been to open the minds of the men and women that are engaged in political decision-making. The basic question we had was our concern for a sustainable prosperity for future generations. The families and entrepreneurs that took the initiative to set up Itinera were worried about the focus and performance of Belgian policy-making. We no longer wanted to be observers, we wanted to contribute to better outcomes for the whole Belgian society.

Itinera managed to surprise many with a series of remarkable books, publications and events, boasting in-depth analyses and robust recommendations from independent academics with an outstanding reputation in their respective fields. It inspired a great number of entrepreneurs to support its work.

Authorities need a flux of creative and evidence-based ideas, in order to tackle the issues they are faced with. And that is exactly what Itinera did: it formulates ideas that are ready for impact. Today, authorities would tend to agree that the country needs entrepreneurial initiative that creates societal value, jobs and prosperity. There is an almost common understanding that wealth distribution needs to rest on wealth creation rather than on sovereign debt, and that our children and grandchildren deserve better than to be the paymasters of our generation.

I applaud the determination of the families, entrepreneurs and enterprises that became our financial partners and joined forces with us since 2006. It is the precondition of what Itinera can achieve, and I would like to reiterate our gratitude and recognition for your continuous support.

With the project 'Itinera 2.0' that we initiated last year, we want to ensure that Itinera is ready to take on the challenges for the next decade. The team defined its new vision and dynamism, and the report on 2015 proves that the decisions the renewed Board took as from 2014 have shown the way forward. We strongly need independent and high-quality expertise with a long term focus, without being hindered by day-to-day hurdles. It inspires all political parties and civil society to take better decisions with regard to large societal domains. We want to continue in that direction.

As entrepreneurs and families, we know very well that we need to invest if we want to reap the benefit of our ideas and strategies. Therefore, 2016 will not only be the year of Itinera's 10th anniversary, but also the year in which Itinera wants to ameliorate its financial basis. I warmly welcome the positive reactions we received from many families, entrepreneurs and enterprises to join the founders of the first decade and to support our endeavor.

Belgium is confronted with more challenges than ever before. We need to be better prepared for the future if we want to preserve the first class role that Belgium has had locally and internationally ever since the aftermath of the Second World War. More than 11 million fellow citizens, with more diversity and more expectations, deserve that we, entrepreneurs in Belgium, are able to continue and expand our support of Itinera without a direct return for our actual business, but with a better long term-perspective for our children and grandchildren.

Bart Verhaeghe

Chairman of the Itinera Institute

Last year, you expressed confidence in the plan 'Itinera 2.0' that we initiated in 2014. We expressed our willingness to be a dedicated team of fellows, driven by excellence and teamship, and to gain more focus in our work. These are the main drivers of Itinera 2.0, and they underpin our resolve for the next decade.

We present the 2015 annual report, on the first year of implementation of the renewed strategy that you endorsed last year, and we thank the members of the Board and all our financial partners for your continuous support.

We now exploit the benefits of Itinera House at their full potential, as top decision-makers of various political parties and members of civil society easily find their way to our inner debates, participate in our exchanges of ideas and join us for dialogues on our analyses and recommendations.

The team grew smaller in the sense that we now have less permanent fellows, but wider in the sense that we expand our team with 'visiting fellows' from different horizons, with a specific emphasis on deepening our expertise and widening our circle of influence in the whole of Belgium. We liaise with academia in North and South, and pay special attention to full national coverage.

Our focus is on societal value creation by entrepreneurs as the driver for prosperity, combined with good governance by public authorities, and committed citizenship by all citizens. The need for sustainable value creation is great, and it requires a stable and foreseeable environment that promotes entrepreneurship and accountability. This is not self-evident in a country that is known for its complex structures and decision-making.

Itinera is a think- as well as a do-tank: we want to spread the word as well. Therefore, we published four books over the course of the last year, we had an unprecedented number of inner debates, conferences and face-to-face discussions with all of our country's political protagonists, we addressed large audiences throughout the country, and we found our way to the various media as well. As per our strategy, we use social media not for interventions in day-to-day polemics, but for the promotion of our publications and events.

For the first time, we present a 3-year plan for Itinera, in order to envision and iterate our intentions for the years ahead. With 3 years to go before the next federal elections, and 2 before the next local and regional elections, we want to weigh in on the strategy and governance by all authorities in 'the Belgian region'. We will feed the electoral debates with substantial *roadmaps* in 2017 and 2018, for the elections in 2018 and 2019.

Itinera has become a recognized and strong brand, and our intention is to be a mature policy institute in Belgium. We inspired a Greek entrepreneur who adopted the Itinera model to start a think tank in Greece, and we are building a European network with comparable think tanks in countries from which we can learn as well.

On behalf of all fellows, I would once again like to thank the Board and all our financial partners. Some of you have shown extraordinary confidence in our work, with very important contracts or donations indeed, and I assure you that we will perform in a robust and performant manner, in accordance with your high expectations. We are grateful for the chance that you give us to play this role as independent influencers in the complex Belgian environment on ever more complex issues.

As the Chairman said, we do hope that we deserve your confidence for broadening and widening our financial basis, so that your fellows and visiting fellows will be able to continue the effort in the next decade.

## **Itinera Analysis Series**

### **1. Welke prioriteiten voor de opvoeding van jonge kinderen in België / Quelles priorités pour l'éducation des jeunes enfants en Belgique?**

**11/03/2015**

The childhood years deserves large attention. Except for an economic function, the education & care of young children (EAJE) have a social function and an educational function. The extension will only answer partially on this challenge. Other measures are necessary to conquer the internal contradictions of EAJE and to guarantee all children a satisfactory development of the cognitive and social skills.

### **2. Waarom vroegschoolse begeleiding niet genoeg is om ongelijkheid weg te werken**

**11/03/2015**

To clear away social inequality in our society remains one of the most formidable contemporary challenges. Although the inequality at global level between countries decreases, according to among others the OECD and examined over the long haul, it stays a vital task at a national level and among others Piketty (2014) frequently describes how the inequality increases. But on which age is most successful to treat this?!

### **3. Op zoek naar goed bestuur: de voorwaarden voor succes / La Bonne Gestion Publique: Les Conditions Du Succès**

**29/04/2015**

Good governance is a very extensive concept which relates to both the tasks of the government, the reached result and also the way a result was pursued, as the cost of it. Obviously, good governance is on the agenda of Itinera. Governments and their activities are important, because of their democratically legitimated directing interventions, what they determine their priorities and objectives with. Also because governments determine the essential frame of prosperity creation, investment initiative and welfare reorganization.

### **4. Vroegtijdig schoolverlaten: meer ambitie nodig om een verloren generatie te vermijden / Décrochage scolaire: il faut plus d'ambition pour soutenir nos jeunes**

**10/11/2015**

In the contemporary society a diploma secondary education (aso, tso, kso, bso) is an important condition to enter the labour market successfully and to remain there. Early school leaving (vsv) is a serious problem which is recognised by virtually all Western countries. If we do not do better as a society, a piece of the younger generation will finish as lost generation.

### **5. Zwakke en sterke zijden van islamitische scholen: is Nederland een model voor België?**

**09/12/2015**

Nowhere in Europe has one found such a mixture of religious schools, financed by the state as in the Netherlands. Nor one finds elsewhere in Europe Islamic schools, financed and supervised by the government. The demand for Islamic schools in other European countries, among which Belgium, makes it interesting to

explain the Dutch model. Which positive added values has the Islamic education? Do Islamic schools satisfy the quality standards? What are the weak sides? And what can we learn about this in the Flemish context?

**6. Het belang van herkomstlanden voor scholen en onderwijssucces van migrantenkinderen**

**09/12/2015**

Analysis by professor Jaap Dronkers in which he investigates the importance of countries of origin of migrants for schools and the education success of migrant children.

**7. De tien wensen voor 2016 van Itinera / Les dix souhaits d'Itinera pour 2016**

**28/12/2015**

In its New Year Letter, Itinera presents its ten wishes for 2016. With contributions of Leo Neels, Ivan Van de Cloot, Marc De Vos, Bilal Benyaich, Johan Albrecht, Jean Hindriks, Alexandre Simons en Simon Ghiotto.

28/08/2015

A hail of statistics and forecasts from the IMF and the European Central Bank (ECB) is confronting us with an undeniable truth – the economy is not recovering fast enough. Growth rates, though positive, are mediocre. And the main indicator of economic recovery, namely anticipatory purchases and investments, i.e. inflation, has been revised downwards, despite the enormous injections of liquidity provided in Europe by the ECB.

**47. Will we ever get out of this economic crisis? / Sortirons-nous de cette crise économique?**

23/09/2015

Opinion article by Bruno Colmant. The real challenge over the next few years will be to avoid the shipwreck of the eurozone economy in what is often called a Japanese-style deflationary scenario - but with the Chinese slow-down feeding into it. This scenario is looking more and more plausible as prices have been stagnating for two years now and the inflation rate remains desperately low. Technically, of course, this could be described as disinflation rather than deflation - or as tendentially low inflation, so as not to stigmatise a generalised fall in prices.
